

THE WHOLE HOUSE SURGE PROTECTOR

How It Works

The average home receives 20 surges of electricity per day. Repetitive surges take a toll and shorten the life of your appliances and sensitive electronics. This can cost you up to \$650 in repairs, not to mention the loss of your valuable time because of inconvenience.

If you have ever flipped on a light switch and blown a light bulb, you have experienced a surge. This is caused by "dirty" electricity coming into your home with no clamping of voltage and/or amperage.

Our Surge Protector/Power Conditioner, "cleans" up the electricity coming into your home and sends any extra voltage and amperage to ground, keeping it from your circuit boards and eliminating unnecessary repairs. Frequently a home can see an average savings of 2-5% on their electricity bill due to the cleaning up of the power coming in and a reduction of excess heat.

Everything that is electrical will last an average of 30% longer, because excess voltage will no longer be allowed into your equipment.

SPECIAL:

\$349 + tax includes install.

CASH CRUNCH? Ask about our 90-day pay-off.

To Schedule an Appointment, send us a request online at our Contact Us page, or call (972) 890-5014

SURGE PROTECTOR/
POWER CONDITIONER
CAN HELP YOU AVOID
UNEXPECTED BREAKDOWN
OF YOUR APPLIANCES**

...and SAVE you money!

Do you dread surprise expenses?

All homes should have surge protection on their appliances and high-end electronics. Almost without exception, today's appliances have at least 1 circuit board (computer) in them and some as many as 4 circuit boards.

As an appliance repair technician, I frequently replace as many as 10 computers in appliances per week. The average cost of such a repair is over \$300.00 and sometimes as high as \$650.00.

In this economy, it pays to **protect and repair** your appliance or TV instead of replacing it.

Our **Whole House Surge Protector** can help you preserve the life of your electronics.

- We offer "whole house" surge protection and power conditioning from the leading manufacturer in the industry.
- Remember to also protect your TVs, computers, and phones from surges that come through your TV signal, Internet connection, or phone line!
- We also offer the smaller surge protectors to protect your appliances, TVs, computers, phones, etc. from internal surges and lightning strikes.

Wall-block Surge Protector - \$39.95

Power Strips - \$99.95

Specs on Surge Protector:

Lifetime Warranty
 Connected Equipment Warranty
 UL Listed OWHX Secondary Surge Arrester
 Tested to ANSI/IEEE C62.1, C62.11
 Surge Current: 150,000 AMPS Total
 Clamping Level: Line to Ground 150VRMS
 MOV Rating
 Line 310VRMS MOV Rating
 Response Time: <5 Nanoseconds
 Installation: Hard wire in parallel
 Thermal Fusing
 Enclosure: 2 7/8" x 3 3/4" x 2" weight 1 lb
 Diagnostic Light: Indicates ground is present and Surge Protection functional

*Taking care of the customer
is our number one priority.*

Companies should be in business first, to serve people. Of necessity, the business must make money so that it can continue to serve people.

A company serves its clients, vendors, and employees.

My wife Nancy grew up in the appliance repair business, and I have learned this industry from her father, Dale Danielson, who has been in the appliance repair business in Albuquerque, NM for more than 50 years. We are honored that he supports us as we expand into the North Texas area.

We hold true to these guiding principles: we exist to serve our customers and do so with respect and honesty. We will tell you straight up if you should replace your appliance! We don't play games.

We're looking forward to serving you!

Sincerely,
Tyler Adkins
